

MURRAY

STATE COLLEGE

Sexual Assault Campus Climate Survey

The Campus Climate Survey

The Murray State College Campus Climate Survey invited all students, faculty, and staff to reflect on individual experiences and perceptions of MSC.

The objective of the study was to provide MSC with information, analysis, and strategic initiatives relating to campus climate.

Through this survey, we gathered a variety of data related to institutional climate, inclusion, and work-life issues so that we can better assess the learning, living, and working environments for MSC students, faculty and staff.

The goal of this important study is to build on institutional successes, address any campus climate challenges, and foster a culture of inclusiveness for an enriched educational and work experience at MSC.

About Campus Climate

For the purposes of this survey, campus climate has been defined as the current attitudes, behaviors and standards of faculty, staff, administrators and students concerning the access for, inclusion of, and the level of respect for individual and group needs, abilities, and potential.

Campus climate is a measure of the perceptions and experiences related to interpersonal, academic, and professional interactions related to Murray State College.

Diversity and inclusion are extremely important aspects of campus climate.
